BOI Conclusions:

Carelessness of deminer and poor supervision in terms of not conducted QC, caused the accident, and happened.

Victim Report

Victim number: 880

Name: [Name removed]

Age:

Gender: Male

Status: deminer

Fit for work: not known

Compensation: Not made available

Time to hospital: Not made available

Protection issued: Not recorded

Protection used: Not made available

Summary of injuries:

INJURIES: severe Foot

COMMENT: "Injuries on his right foot ankle". No Medical report was made available.

Analysis

The primary cause of this accident is listed as a *Field Control Inadequacy* because the investigators found that no Quality Control was conducted, from which it is inferred that field supervision was lacking. The secondary cause is listed as *Other* because the summary does not contain enough detail to infer the activities at the time of the accident.

The “Inadequate investigation” listed under notes refers to the absence of a full accident report. The UN supported MACCA has failed to make these widely available for some years in contravention of the requirements of the IMAS. The failure of the UN to share the Afghan investigators’ work with others is regrettable.
