Analysis

The primary and secondary causes of this accident are listed as *Other* because the accident summary lacks enough detail to infer anything useful about the events surrounding the accident.

The "Inadequate investigation" listed under notes refers to the absence of a full accident report. The UN supported MACCA has failed to make these widely available for some years in contravention of the requirements of the IMAS. The failure of the UN to share the Afghan investigators' work with others is regrettable.
